

WHAT IS JUVASONIC®

JUVASONIC® is a needleless, pain-free treatment that enhances the absorption of topical anti-aging serums by temporarily disrupting the stratum corneum (outer skin layer). Using sonic vibration and nano diamond chip technology, JUVASONIC® gently removes the top layer of skin, optimizing the penetration of skincare products for maximum clinical outcomes.

"JUVASONIC® is a breakthrough in aesthetic medicine. This needle-free technology boosts topical absorption, enhancing results with no discomfort—a valuable addition to our practice."

— Jeffrey Rapaport, MD

Before

After

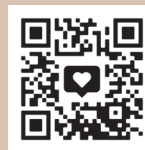

Recommend: 4- 6 treatments for optimal results. Ask your provider about maintenance program.

ARE JUVASONIC® TREATMENTS RIGHT FOR YOU?

With JUVASONIC®, you can be assured of no pain or downtime with maximum absorption of topical anti-aging serums.

- ⤴ **Improves** skin texture, tone, and hydration
- ⤴ **Reduces** fine lines and crepey skin
- ⤴ **Speeds** up recovery from microneedling and laser treatments
- ⤴ **Minimizes** pigmentation issues and large pores
- ⤴ **Dissipates** filler nodules
- ⤴ **Safe** for all skin types (Fitzpatrick I-V)
- ⤴ **Treats** face, eyes, lips, décolletage, and hands
- ⤴ **Enhances** results when combined with microneedling, laser, threads, Botox, or fillers

HOW DOES JUVASONIC WORK?

Before Treatment: The **outer layer of the skin** is intact, naturally limiting serum penetration.

During Treatment: JUVASONIC® temporarily opens the **outer layer of the skin**, enhancing the absorption of skincare products.

15 Minutes Post-Treatment: The **outer layer of the skin** fully recovers, ensuring both safety and effectiveness.

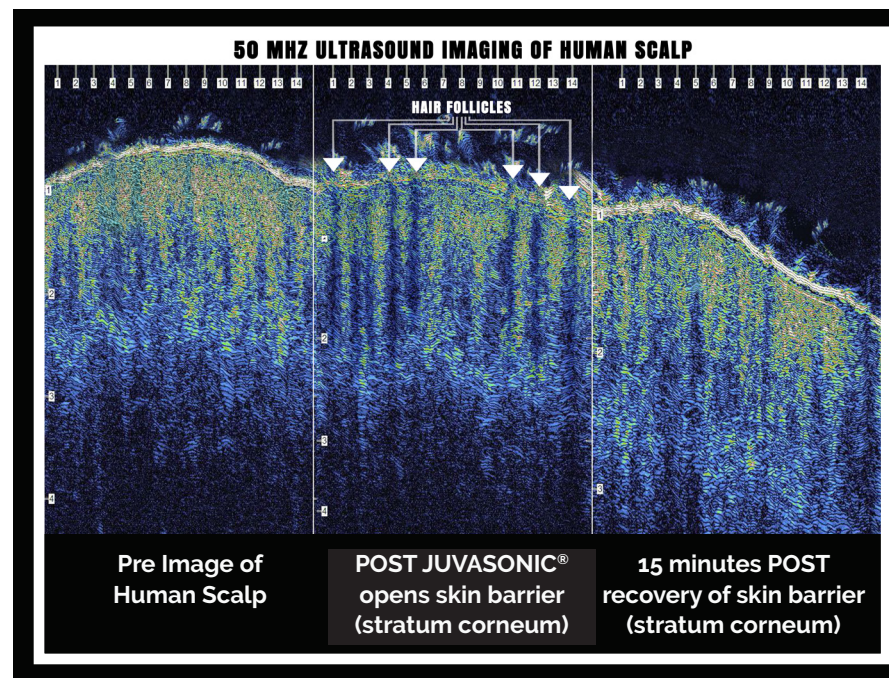

DOES JUVASONIC® HURT?

JUVASONIC® treatments are painless and require no needles or topical pain control. Our clinically validated protocols enhance topical delivery for maximizing results.

SCIENTIFICALLY VALIDATED

JUVASONIC® has been scientifically tested by physicians to improve the topical absorption of anti-aging serums, leading to faster recovery and better treatment outcomes.

The image above depicts the scalp of a 61-year-old male patient. In the pre-JUVASONIC® picture, the stratum corneum (SC) is completely intact. However, the post-JUVASONIC® application clearly demonstrates the temporary removal of the SC. Note that the white arrows indicate the delivery of exosomes. The third panel shows the SC repaired just 15 minutes after treatment.

CAN JUVASONIC BE COMBINED WITH OTHER TREATMENTS?

YES!! JUVASONIC® is an ideal complement to many cosmetic and regenerative treatments, including:

- 🔊 Botox, Fillers, Peels, Threads
- 🔊 PRP/PRF Facials
- 🔊 Hair Restoration
- 🔊 Microneedling & Laser Recovery
- 🔊 Face mask can be applied at end of procedure for ultimate experience & optimal result.

POST PROCEDURE APPEARANCE

When using JUVASONIC® as a stand alone treatment, some redness may occur. Consult with your provider when combined with more aggressive treatments.
